**(54) PHARMACEUTICAL PREPARATION CONTAINING ANTIULCER AGENT**

(57) Abstract:

PURPOSE: To provide a stable preparation containing antiulcer agent, having extremely high storage stability to keep the preparation from discoloration over a long period and resistant to the lowering of dissolution property even after storing for a long period under severe condition.

CONSTITUTION: A core part containing a benzimidazole compound having antiulcer action and unstable to acid is coated with one or two undercoating layers and the coated product is further coated with an enteric coating agent to obtain an enteric agent. In the above process, the core part and/or the undercoating layer are compounded with aluminum hydroxide/sodium bicarbonate coprecipitate or the compound and a buffering agent.
